Flashing beacons to be installed at the intersection of ND Highway 1 and ND Highway 46 east of Litchville

Starting today, Fargo Electric will be installing flashing beacons, a new electrical pole and overhead wire at the intersection of ND Highway 1 and ND Highway 46 about 5 ½ miles east of Litchville corner. Traffic will only be impacted when workers are present on the roadway later this week.

During the project:

- Traffic speeds should not be impacted while work is off the roadway
- Signage will be in place
- Flaggers will direct northbound and southbound traffic while work is in progress on roadway

The project is expected to be complete by the end of the week.
